NorthConnex (SSI-6136) – Urban Design and Landscape Management Plan Stage 1B (Condition B33) – Retaining Wall

The Urban Design and Landscape Plan (UDLP) describes how the new design elements of the project will look and was developed based on the preliminary designs presented in the Environmental Impact Statement for the project.

Stage 1b involves the design of the motorway operations complex western retaining walls, 300m long and with a height ranging from 0.75m to 6m, and a 4.8m high noise barrier, as part of the operational ancillary facilities.

A targeted consultation with directly impacted residents and property owners has been completed.

This letter confirms the Department of Planning and Environment approval dated 21 December 2017 for the western retaining wall, fencing and landscape works only, which has satisfied the requirements of Condition of Approval B33.

A handwritten signature in black ink, appearing to read "Sonja Shand".
