Acoustic Shed Decommissioning – Southern Interchange Compound, West Pennant Hills

Dear resident,

Excavation of the NorthConnex tunnel has been carried out since May 2016 at the Southern Interchange on the corner of Eaton Road and Pennant Hills Road. An acoustic shed was constructed over the shaft to help minimise noise and dust from 24 hour excavation activities.

In December 2017, the project celebrated its first tunnel breakthrough between the Southern Interchange and Wilson Road Compound. Work to excavate the Southern Interchange is nearing completion, with the remainder of rock to be removed via Wilson Road Compound.

The permanent Motorway Control Centre, ventilation facility and emergency response facility will be built at the Southern Interchange. The acoustic tunnelling shed will be decommissioned so work on the permanent facilities can commence. Decommissioning will start from **Monday 19 March** and is expected to be completed by the **end of May 2018**, weather permitting.

Where possible, work will be carried out during standard construction hours **Monday to Friday 7am to 6pm and Saturdays 8am to 1pm**. To ensure the safety of workers, some work may be carried out at night and on weekends.

Plant and equipment for this work includes an excavator, two cranes, elevated work platforms, rattle gun, generator, flatbed truck, hand tools, lighting towers and light vehicles.

You may experience some noise during this work and we will make every effort to minimise impacts by:

- > using non-tonal reversing beepers on machinery
- > turning off equipment and vehicles when not in use
- > using solar-powered lighting towers where possible
- > using noise blankets where feasible
- > directing noise generating equipment away from residential properties where possible.

If you have any questions or complaints please contact us on 1800 997 057 (24 hours), enquiries@northconnex.com.au or visit the NorthConnex Community Information Centre at 118 Yarrara Road, Pennant Hills, open Monday to Wednesday, from 9am to 1pm.

Yours sincerely

NorthConnex Project Team
