Work to build permanent Motorway Control Centre - Southern Interchange Compound, West Pennant Hills

Dear resident,

Excavation of the NorthConnex tunnel has been carried out since May 2016 at the Southern Interchange on the corner of Eaton Road and Pennant Hills Road.

The permanent Motorway Control Centre, ventilation facility and emergency response facility will be built at the Southern Interchange. To facilitate construction of the permanent facilities, work has commenced to decommission the site's acoustic shed. The tower crane has been installed to carry out this work, which is expected to be completed by mid 2019, weather permitting. The main work activities include:

- > removing the existing water treatment plant and treated water storage tank
- > removing internal hoardings, concrete slabs and haul roads
- > relocating the site offices and amenities from the northern end of the site to above the permanent detention basin located on the western boundary in the centre of the compound
- > construction of retaining wall
- > extension of tower crane boom

This will include concreting, shotcreting, steel fixing, formwork, water management, ventilation, drainage work, service installation and relocation, signage installation, pavement work, installation of precast structures and deliveries.

Where possible, work will be carried out during standard construction hours **Monday to Friday 7am to 6pm and Saturdays 8am to 1pm**. To ensure the safety of workers, some work may be carried out at night and on weekends.

Plant and equipment for this work includes excavators with various attachments, surface miner, hand tools, power tools, trucks, concrete agitator trucks, concrete pumps, concrete vibrators and screeds, sucker trucks, sweeper truck, lighting, light and heavy vehicles, paving machine, profiler, spray seal, core drill, line marking plant, line marking removal plant, bobcats, jackhammers, cranes and saw cutting machines.

You may experience some noise during this work and we will make every effort to minimise impacts by:

- > using non-tonal reversing beepers on machinery
- > turning off equipment and vehicles when not in use
- > using solar-powered lighting towers where possible
- > using noise blankets where feasible
- > directing noise generating equipment away from residential properties where possible

Australian Government

BUILDING OUR FUTURE

Tunnel fit out work is under way and includes installation of services and cabling, tunnel paving and lining as well as mechanical and electrical equipment.

If you have any questions or complaints please contact us on 1800 997 057 (24 hours), enquiries@northconnex.com.au or visit the NorthConnex Community Information Centre at 118 Yarrara Road, Pennant Hills, open Monday to Wednesday, from 9am to 1pm.

Yours sincerely

NorthConnex Project Team
