Dear Resident

Installation of a Pennant Hills Road gantry, Normanhurst

We are progressing with plans to install a gantry on Pennant Hills Road as part of the compliance regulations that will see trucks required to use the NorthConnex tunnel, unless they have a genuine destination accessed via Pennant Hills Road.

As you know, the NSW Government is delivering NorthConnex, a nine-kilometre tunnel that will link the M1 Pacific Motorway at Wahroonga to the Hills M2 Motorway at West Pennant Hills.

NorthConnex will allow motorists and around 5,000 heavy vehicles per day to bypass Pennant Hills Road, providing more reliable and safer travel conditions, while also returning local streets to local communities. The project will also help to reduce traffic noise on Pennant Hills Road for nearby residents.

The gantry will monitor trucks on Pennant Hills Road, and be located on the southern side of the intersection with Kenley Road and Campbell Avenue. We have included a map over the page showing the location of the gantry.

What will our work involve?

Our work to install the gantry will involve five stages:

1. Setting up the site
2. Relocating underground utility services
3. Installing the footings for the gantry
4. Installing the enforcement gantry
5. Connecting the gantry to the Intelligent Transport System.

Most of our work will occur on Pennant Hills Road. We will also need to complete some work on Kenley Road and Campbell Avenue to relocate underground utilities and install the gantry footing.

When will the gantry be built?

Our work is expected to start in September 2019. We will complete most of the work at night to minimise impact on traffic and to keep our workers and the community safe. Some of this work may be noisy but we will have measures in place to help reduce this noise.

We will be in contact with you again before starting work to provide more information.

Please contact us on **1800 997 057 (24 hours)** or email ncxcommunitymanager@transurban.com if you have more questions regarding this work.

Yours sincerely

NorthConnex Project Team
