Night work: M1 Pacific Motorway traffic realignment, Wahroonga

Dear resident,

As part of ongoing M1 Pacific Motorway widening work, the project team will divert northbound traffic on the M1 Pacific Motorway between Pennant Hills Road and 300 metres north of Pacific Highway, Wahroonga. The traffic realignment will allow us to safely build the southbound tunnel entry ramp and the northbound tunnel exit ramp.

The traffic realignment will take place during the evening of **Sunday 27 May 2018**. Northbound traffic will be diverted to the new northbound lane arrangement and southbound traffic will continue to use the southbound road bridge opened in October 2017. This work is expected to take one night to complete, weather permitting and will be carried out **between 9pm and 5am**. If the work is delayed, it will be carried out on the next available night shift.

A detour will be in place for northbound motorists for the safety of workers and road users. Motorists travelling north on the M1 Pacific Motorway will be diverted on to the Pacific Highway from Pennant Hills Road and then left on to the M1 Pacific Motorway via the on-ramp. We anticipate this detour will take an additional five minutes. A map of the work area and the realignment route is provided.

The main work activities include installing barriers, signage, lights and signals, traffic light modification, removing noise walls, asphaltting, saw cutting and line marking.

Plant and equipment for this work includes cranes, excavators, bob cat, jack hammers, surface profilers, asphalt paving machines, heavy and light vehicles, lighting towers, generators, rattle guns, hammer drills, grinders, concrete trucks, street sweepers, vacuum trucks, water carts and pumps, elevated work platforms, concrete saws and pumps, core drills, line marking and removal plant, as well as hand tools.

You will experience noise during some of these activities and we will make every effort to minimise impact by:

- > Consulting with directly affected residents
- > Using non-tonal reversing beepers on all machinery
- > Turning off equipment and vehicles when not in use
- > Using solar-powered lighting towers.

Traffic control and pedestrian management will be in place to ensure the safety of motorists, residents and workers. Please allow extra travel time and visit livetraffic.com, download Live Travel App or call the Transport Management Centre 132 701 for the latest information. Access will be maintained for motorists at all times.
