## NorthConnex Northern Ventilation Facility, Wahroonga – crane installation

Dear resident

NorthConnex is continuing work to build the Northern Ventilation Facility on the M1 Pacific Motorway northbound at Wahroonga with work expected to be completed in 2018, weather permitting. Work to build the facility will include the use of a tower crane to lift materials to the site.

The tower crane will be installed at the Northern Ventilation Facility site **between 5am and 6pm Monday 5 February and Tuesday 6 February**. In the event of a delay, work will be carried out on the next available day. Tree trimming inside the work site will be carried out before the crane installation.

Work to install the tower crane will start at 5am due to the need to lift powerlines to allow deliveries by heavy vehicles via Fern Avenue and Woonona Avenue. There are no planned interruptions to services as part of this work.

Parking will be restricted in Woonona and Fern avenues on these days to facilitate heavy vehicle access.

You may experience some noise from the temporary mobile crane used to install the tower crane but we will make every effort to minimise impact by turning off equipment and vehicles when not in use and directing noise generating equipment away from residential properties where possible. The tower crane operation is not expected to be noisy.

Generally, the crane will operate during standard construction hours between 7am and 6pm, Monday to Friday and 8am and 1pm on Saturdays. Work may also be carried at night or on weekends for the safety of motorists and workers or when minimal noise impacts permit. Night work is carried out between 9pm and 5am Sunday to Friday. No work is carried out on Saturday nights.

Traffic control and pedestrian management will be in place for the safety of motorists, residents and workers.
