## Night and day work: Southern Interchange Compound, West Pennant Hills

Dear Resident,

Work is continuing on the construction of the Motorway Operations Complex permanent facilities as part of the \$3 billion NorthConnex project to:

- > construct the Motorway Control Centre, ventilation facility, maintenance centre, covered service yard, parking and storage facilities
- > construct the northbound tunnel entrance next to the motorway control centre.

A map of the work area is provided.

Ongoing work includes:

- > excavating to refine the tunnel's shape and exit and entry ramps including installation of soil nails and shotcrete, and removing spoil
- > road surface and tunnel work including concreting, asphaltting, line marking and saw cutting
- > installing services, lighting, drainage, retaining walls and permanent noise walls
- > mechanical and electrical fit out of the facilities and the tunnel
- > removing internal hoarding, concrete slabs and haul roads
- > vegetation maintenance
- > reinstatement work including landscaping, signs and paths
- > deliveries, survey, maintenance and inspection activities.

## How will the work affect you?

You will experience some noise and we will make every effort to minimise impacts by:

- > consulting with directly affected residents
- > using non-tonal reversing beepers on all machinery
- > turning off equipment and vehicles when not in use

### Work hours

7am to 6pm Monday to Friday,

8am to 1pm Saturdays

For the safety of motorists and workers, work may be carried out outside of these hours, in line with our environmental approvals.

Tunnel excavation, associated above ground activities and access to compounds is carried out **24 hours a day**.

### More information

Call 1800 997 057 (24 hours), email [enquiries@northconnex.com.au](mailto:enquiries@northconnex.com.au).

Australian Government

**BUILDING OUR FUTURE**

**Transurban**

- > using lighting towers only where necessary
- > using noise blankets where possible
- > avoiding shouting or unnecessary noise and using radio communication.

### **Traffic management**

Traffic control and pedestrian management is in place for the safety of motorists, residents and workers. Please allow extra travel time and visit [livetraffic.com](http://livetraffic.com), download Live Traffic App or call the Transport Management Centre 132 701 for the latest information.

### **Plant and equipment**

The project team will use excavators with various attachments, hand tools, power tools, concrete agitator trucks, concrete pumps, concrete vibrators and screeds, concrete saw, excavators, sucker trucks, sweeper truck, pumps, vacuum trucks, lighting, light and heavy vehicles, paving machines, profilers, spray seal plant, core drills, line marking plant, line marking removal plant, bobcats, jackhammers, cranes and saw cutting machines.

Thank you for your patience during this important work.
