Day and night work: Coral Tree Drive substation connections

Dear resident,

NorthConnex is building a power substation at Coral Tree Drive to supply electricity to the NorthConnex Motorway Control Centre and tunnel for operational lighting, ventilation and water treatment. To connect power to the substation, the project team is installing underground electricity cables from Coral Tree Drive, Carlingford to the Carlingford transmission station, on the corner of Pennant Hills Road and Jenkins Road via Oakes Road.

Work hours

This work is generally carried out during standard construction hours between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays**, however for the safety of motorists, pedestrians and workers, some work is also carried out at night **between 9pm and 5am Sunday to Friday**.

We will be working at night at Oakes Road between Carmen Drive and Mundon Place **from Tuesday 13 November to Friday 30 November 2018**, weather permitting, to erect scaffolding, commission an electrical pole and dismantle scaffolding. If work is delayed, it will be done on the next available night shifts.

Equipment

Plant and equipment for this work includes a 50 tonne crane, elevated work platform, lighting towers, cable pulling equipment, power and hand tools, heavy and light vehicles, and generators.

How will the work affect you?

You will experience noise during this work and we will make every effort to minimise impacts by:

- > completing the noisiest work by midnight
- > using non-tonal reversing beepers on all machinery
- > turning off equipment and vehicles when not in use.

Traffic management

Traffic control and pedestrian management will be in place to ensure the safety of motorists, residents and workers. Please allow extra travel time and visit livetraffic.com, download Live Traffic App or call the Transport Management Centre 132 701 for the latest information.
