Day and night work: Trelawney Street permanent tunnel support facility

Dear Resident,

Work is continuing on the \$3 billion NorthConnex project to build the permanent tunnel support facility at Trelawney Street, Thornleigh.

Demobilisation of the work site in preparation for building the permanent facility is underway.

Upcoming work includes:

- > removing temporary construction facilities including buildings, sheds and internal roads
- > dismantling the water treatment facilities
- > building the permanent facility above and below ground
- > changes to concrete barriers, gates, hoarding and signs on Pennant Hills Road
- > earthworks and installation of building components
- > road surface work including concreting, asphaltting, line marking and saw cutting
- > installing the permanent lighting, drainage and retaining walls
- > reinstatement work including landscaping, signs and paths
- > miscellaneous deliveries, survey, maintenance and inspection activities.

Work hours

7am to 6pm Monday to Friday,
8am to 1pm Saturdays

For the safety of motorists and workers, work may be carried out outside of these hours, in line with our environmental approvals.

Tunnel excavation, associated above ground activities and access to compounds is carried out **24 hours a day**.

BUILDING OUR FUTURE

Transurban

How will the work affect you?

You will experience noise, light and increased vehicle movements during some of these activities. We will make every effort to minimise impacts by:

- > consulting with directly affected residents
- > using non-tonal reversing beepers on all machinery
- > turning off equipment and vehicles when not in use
- > using lighting towers only where necessary
- > scheduling noisier work for completion earlier in the evening where possible
- > avoiding shouting or unnecessary noise and using radio communication.

Traffic management

There will be intermittent lane closures on Pennant Hills Road and adjoining streets with local detours. Traffic management and signage will be in place to ensure the safety of motorists, residents and workers.

Please allow extra travel time and visit livetraffic.com, download Live Traffic App or call the Transport Management Centre 132 701 for the latest information.

Plant and equipment

The project team will use a large range of plant and equipment including heavy and light vehicles, concrete trucks, vacuum trucks, street sweepers, tipper trucks, line marking and removal plant, sweepers, concrete saws, bobcats, concrete breakers, lighting towers, asphalt pavers, grinders, water carts, rollers, cranes, excavators with and without hammer attachments, hammer drills, core drills, rattle guns, generators, knuckle boom lifts, elevated work platforms, pumps and vibrators, jackhammers, power tools and hand tools.

Thank you for your co-operation and patience in 2020 as we work towards delivering the project.

Yours sincerely,

NorthConnex Project Team
