Dear Resident

Installation of a Pennant Hills Road gantry, Normanhurst

We are progressing with plans to install a gantry on Pennant Hills Roads as part of the compliance regulations that will see trucks required to use the NorthConnex tunnel, unless they have a genuine destination accessed via Pennant Hills Road. NorthConnex will return local streets to local communities and remove around 5,000 trucks per day off Pennant Hills Road.

This gantry will monitor trucks on Pennant Hills Road, and be located on Pennant Hills Road on the southern side of the intersection with Kenley Road and Campbell Avenue. We have included a map overleaf showing the location of the gantry.

What is the purpose of the gantry?

The gantry will be used to record truck movements only as part of the regulations for Pennant Hills Road that will be in place once NorthConnex opens in 2020.

What will the gantry look like?

The gantry will look similar to other road gantries across Sydney and its design is consistent with the gantries that were included in the Urban Design and Landscape Plan for NorthConnex, which was publicly exhibited for community feedback in November 2016. It will span across Pennant Hills Road, and be around seven metres high.

How can I provide feedback?

We are seeking your feedback on our gantry installation plans. If you would like to provide any comments, need more information about the work or meet with us, please contact our community team by calling 1800 997 057 (24 hours) or emailing ncxcommunitymanager@transurban.com.

Yours sincerely
